Refresh yourself with a perfectly chilled bottle or can...

## Taking Cold Drinks Vending to the *BevMax*!

...from the impressive BevMax 2!

Crane Merchandising Systems welcomes another exciting addition to its portfolio of cold drinks vending machines - the **BevMax 2**.

The impressive BevMax 2 can hold a full range of bottles (both PET and glass) and cans in all popular shapes and sizes, with a total capacity of 495 drinks and 45 different selections. The machine is particularly quick and easy to load and maintain, making it extremely operator friendly.

The large, illuminated glass front of the BevMax 2 provides consumers with a clear, unobstructed view of all products available, allowing maximum impact. The motorised x-y delivery system collects and delivers the chosen vend with little or no agitation, before retracting out of sight in the door.

The BevMax 2 is available in its standard black livery, shown left, and styled to complement other CMS equipment, offering customers a consistent bank of vending solutions from hot beverages and cold drinks to snacks and food machines.

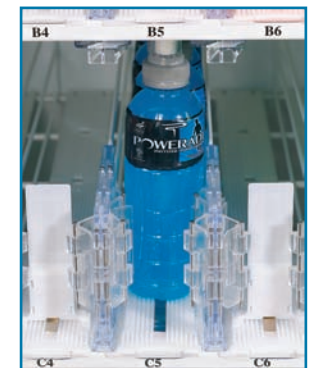

### Product Trays and Capacity

- Standard capacity, 5 trays with 45 product selections and 9 selections per tray
- Up to 495 product capacity
- Tall product pushers reduce the risk of product tipping
- Trays are adjustable and free of wiring harnesses, motors or solenoids, ensuring reliable operation

### Dual Gate Vend System

- Dual delivery gates provide a truly shimless vending system
- Allows bottles and cans of different sizes and shapes to be loaded and vended without adjusting the set up
- Simple yet accurate mechanism ensures positive product vend every time
- Quick and easy to load. No heavy trays to pull out!

## Fast, Smooth Product Delivery System

The BevMax 2 features a fast and accurate x-y product delivery mechanism which is able to vend virtually any permutation of cans, PET and glass bottles. With a market leading customer selection to product delivery time, the BevMax 2 provides the perfect solution for busy vend areas.

The delivery cup (left) retrieves each vended product and places it into the secure delivery port with little or no agitation. The system provides total control throughout the vend cycle, eliminating the possibility of product tipping from the tray during or after the vend. Between vends the delivery mechanism retracts out of sight in the bottom of the door providing customers with an unobstructed view of all available products.

The rotating delivery hopper (right) illuminates and opens automatically when a product is dispensed, providing a convenient and customer-friendly product retrieval experience. The delivery port is also vandal resistant, preventing pilfering from the cabinet.

## Why choose BevMax 2?

- Fast and accurate X-Y delivery system picks and delivers product smoothly with little or no agitation
- Rotating, fully illuminated delivery port features positive vend detection
- Large, fully illuminated interior provides excellent brand visibility
- Dual delivery gates provide a truly “shimless” vending system, allowing multiple size products to be vended
- Trays are adjustable and free of harnesses, solenoids and motors. Tall product pushers reduce tipping
- Operator friendly! Extremely easy to fill, clean and maintain
