ENERGISER

High volume cold beverage merchandiser!

Crane Merchandising Systems brings you the perfect product to keep your cool...The **Energiser** is a cold drinks vending machine made available through a partnership with Sanden Vendo UK.

The Energiser's large glass front makes it an attractive proposition for consumers as they can view the complete range of cold drinks available. Thanks to the fully adjustable product trays the machine can include a variety of different packaging types including cans, tetra packs and glass and plastic bottles, in a variety of sizes.

The Energiser is styled to match the other equipment in the Crane Merchandising Systems' range, offering customers a real one-stop solution for all their vending requirements, from hot beverages to snack, food, and now also cold drinks!

Why choose Energiser?

- Motorised delivery system picks and delivers product with little or no agitation
- Motorised and illuminated delivery hopper
- Large, fully illuminated "shop window" increases product appeal
- Product trays pull forward for easy loading and lift out easily for cleaning
- Machines can be configured with 5, 6 or 7 shelves of product trays
- Operator friendly! Easy to fill, clean and maintain

Flexible Delivery System

The Energiser features a unique delivery mechanism which is able to vend virtually any beverage package between 50mm - 75mm (2" - 3") diameter and 75mm - 240mm (3" - 9.5") in height.

The delivery mechanism (left) retrieves each vended product and places it into a secure delivery port with little or no agitation. The system provides total control throughout the vend cycle to eliminate the product tipping from the shelf during or after the vend. Between vends the delivery mechanism retracts out of sight in the

bottom of the door providing customers with an unobstructed view of all available products.

The motorised delivery hopper (right) is illuminated for customer convenience. An auto-retract feature is incorporated should an obstruction be encountered when closing.

Easy Product Loading

- Easy loading to the rear of the trays ensures products are always at the correct delivery temperature
- Telescopic loading rack is available as an optional extra

Refrigeration Unit

- Cassette-style refrigeration unit is totally self contained
- Ultra-quiet operation
- Easy to remove for service or maintenance

Product Trays

- Product trays pull forward for easy loading and lift out easily for cleaning
- Product pushers lock at back of trays allowing for hands-free, first in first out loading. They automatically reset when the product trays are pushed back into place
- Energiser machines can be configured with 5, 6 or 7 shelves of product trays
